PARK JI			
ROMERO JUAN			
SWEEZER LANCE			
THOMAS JERIN			
WOLFING ALEXANDER			
YEOM ISAAC			

Instructions

Grade at least 4 even problems (unless there aren't 4 problems to grade). Pick problems from the beginning, middle, and end of the section to grade.

Grade each assignment out of 20 points possible, however you may choose the method for assigning credit.

You are responsible for providing your own solutions to the problems (no key is provided). If you are unclear as to the solution of a problem that needs to graded, please make sure you understand the solution prior to assigning grades. You may certainly ask me or tutors for assistance.

If solutions are incorrect, write out the correct solution and indicate where in the work the error(s) occured.

Please **return** the graded homework in two days with the grades recorded on this form.

Please **give** me a copy of the key so that I can post it on the website.

In compensation for completing this exercise, you will receive full credit for this assignment.
